Applied Pulsed Power News Announcement 1st March 2010

APP has hired Mr. Frank Reles in the new position of Manufacturing Operations Manager. Frank brings many years of experience in manufacturing operations and quality control to our company, and will re-organize and upgrade our manufacturing and quality control systems now in place. We are confident that you will experience higher quality products with consistent delivery times in the future, and look forward to improved customer satisfaction as a result. With regard to the needs of our customers, the transition of our manufacturing division from our present system to new, more efficient organization will be done with a view toward minimizing interference with current production schedules.

We hope you will join us in welcoming Frank to our organization, and we are confident that Applied Pulsed Power, Inc will be growing with the future to provide continually improving customer service and satisfaction.
